Topology and its Applications
Volume 144, Numbers 1 – 3, 28 October 2004

Contents

Contributions

E. Falbel, J.-P. Marco and F. Schaffhauser
Classifying triples of Lagrangians in a Hermitian vector space 1

J. Jezierski, J. Kędra and W. Marzantowicz
Homotopy minimal periods for NR-solvmanifolds maps 29

G. Mukherjee and N. Pandey
Homotopy G-algebra structure on Bredon–Illman cochain complex 51

M. Džamonja and G. Plebanek
Precalibre pairs of measure algebras 67

A. Bouziad and J.P. Troallic
Functional equicontinuity and uniformities in topological groups 95

J.J. Charatonik and A. Illanes
Mappings on dendrites 109

J. Cao, T. Nogura and A.H. Tomita
Countable compactness of hyperspaces and Ginsburg's questions 133

D. Schütz
Zeta functions for gradients of closed 1-forms 147

B.D. Park
Constraints on Alexander polynomials of certain two-component links 161

R. Sadykov
Elimination of singularities of smooth mappings of 4-manifolds into 3-manifolds 173

M.R. Casali
Computing Matveev's complexity of non-orientable 3-manifolds via crystallization theory 201

R. Qiu and S. Wang
Simple, small knots in handlebodies 211

T. Kuessner
Foliated norms on fundamental group and homology 229

H.Y. Chu and J. Shin
Free actions of finite groups on the 3-dimensional nilmanifold 255

J. Kindler
Helly and Klee type intersection theorems for finitary connected paved spaces 271
